PRODUTOS QUÍMICOS – PLÁSTICOS

IMPORTAÇÃO – DISTRIBUIÇÃO – EXPORTAÇÃO

FICHA TÉCNICA DO PRODUTO

ACETATO DE SÓDIO TRIHIDRATADO

DESCRIPTION:

Sodium Acetate trihydrate is a crystal very soluble in water.

PRODUCT PROPERTIES

Product name	Sodium Acetate trihydrate
Formula	CH ₃ COONa. 3H ₂ O
Molecular weight	136.08 g/mol
CAS No.	6131-90-4
EINECS No.	2048238

APPLICATION:

Sodium acetate is also used in leather tanning and textile dyeing, in the photographic industry, as a polymerisation catalyst, in detergents and for thermal energy storage.

STABILITY

Stable for 3 years from date of production. Physical stability may change before end of shelf-life if not stored in its original packaging under cool, dry and well ventilated conditions (limited temperature variations and low humidity levels). Pallets should not be stacked.

HANDLING

Product has no classification. Always check the Material Safety Data Sheet and Label before using the product.

PACKAGING

25 kg polyethylene bags.

SAFETY PRECAUTIONS

Please see the Material Safety

SPECIFICATIONS:

Appearance	-	white crystals
Assay	% (m) min	> 58 %
pH of 10% solution	-	7.0 – 10.0
Chloride (Cl)	% (m) max	0,2
Sulphate (SO ₄)	ppm max	500
Iron (Fe)	ppm max	10

Nota:

Esta ficha técnica está baseada na facultada pelo n/ fornecedor e que possuímos em arquivo.
